Preface

The U.S. Department of Homeland Security Grants Programs Directorate requires that every State and Urban Area conduct an Integrated Preparedness Planning Workshop to develop a multi-year Integrated Preparedness Plan annually.

The Vermont Integrated Preparedness Plan is the roadmap for Vermont to accomplish the priorities described in the Vermont Threat and Hazard Identification and Risk Assessment & Stakeholder Preparedness Review. Vermont has pursued a coordinated approach that combines enhanced planning, new equipment purchases, innovative training, and realistic exercises to strengthen Vermont's prevention, protection, response, recovery, and mitigation mission areas. Training and exercises play a crucial role in this approach, providing Vermont with a means of attaining, practicing, validating, and improving Capabilities within each of the mission areas.

The State's training and exercise programs are administered by Vermont Emergency Management, in coordination with Federal Agencies, State Agencies, and local governments. The training and exercise agenda described in this plan will be tracked, and those trainings and exercises conducted by Vermont Emergency Management will be reported as required. This plan helps prepare Vermont to optimally address both the natural and human-caused threats and hazards that it faces, including the hazards described in the State Emergency Management Plan.

Vermont Emergency Management

Vision

A Fully Prepared and Resilient Vermont

Mission

Vermont Emergency Management ensures the people and communities of Vermont have the capabilities to prevent, protect, mitigate, respond to, and recover from natural and man-made threats and hazards in order to enhance the safety, quality of life, and economic vitality of the State and its citizens.

Integrated Preparedness Plan Background

The goal of this Integrated Preparedness Plan is to document how Vermont intends to close priority gaps in Planning, Training & Exercising programs for 2021-2024. Each priority is linked to a corresponding core capability. This Integrated Preparedness Plan identifies the plans, trainings and exercises that will help the State build and sustain the Core Capabilities and gaps identified during the Integrated Preparedness Planning Workshops. Capabilities-based planning provides the foundation for developing exercise program priorities, identifies sets of capabilities to exercise, determines the conditions and scenarios that should be included and addressed in exercises, and sets the performance threshold training and exercises work to evaluate and validate. By increasing our capabilities within the Core Capabilities, we are able to enhance our response to all hazards – including those identified in the Threat and Hazard Identification and Risk Assessment and the State Emergency Management Plan.

The Integrated Preparedness Plan lays out a combination of progressively building exercises – along with the associated training and planning requirements – which address the priorities identified in the Integrated Preparedness Planning Workshops. A progressive, multi-year exercise program enables organizations to participate in a series of increasingly complex exercises, with each successive exercise building upon the previous one until mastery is achieved. After each exercise, corrective actions are identified and prioritized by setting dates for completion. Further, by including training and planning requirements in the planning process, organizations can address known shortfalls prior to exercising capabilities.

Included in the Integrated Preparedness Plan is the training and exercise schedule, which provides a schedule of the proposed activities that are scheduled for the years 2021-2024. It is representative of the natural progression of training and exercises that should take place in accordance with the HSEEP building-block approach.

Vermont held its 2021 Integrated Preparedness Planning Workshops in a virtual environment on July 1st and July 15th. Organizations represented at these workshops included:

- American Red Cross
- Federal Emergency Management Agency (Region 1)
- National Weather Service
- Vermont National Guard
- Agency of Digital Services
- Agency of Human Services
- Vermont Department of Health
- Department of Forest, Parks & Recreation
- Buildings and General Services
- Agency of Education
- Agency of Transportation
- Department of Labor
- Department of Public Service
- Vermont Emergency Management
- Division of Fire Safety
 - USAR
 - HAZMAT
- Vermont State Police
- Vermont Criminal Justice Training Counsel
- Vermont Fire Academy
- Vermont 2-1-1
- Vermont Healthcare Emergency Preparedness Coalition
- Regional Planning Commissions
- Vermont Homeland Security Unit Training & Exercise Working Group
- Norwich University Applied Research Institute
- Williston Fire Department

Program Priorities

Vermont performs numerous assessments that determine training and exercise needs. These assessments include (but not limited to):

- Threat and Hazard Identification and Risk Assessment
- Stakeholder Preparedness Review
- Vermont Emergency Management Engagement Survey
- Exercise After Action Reviews
- Real-World Event Improvement Plans
- Other reports and assessments

The Integrated Preparedness Plan is in agreement with the common gaps identified through local and state assessments. However it may not align with every assessment due to unique jurisdictional needs and variations of the different assessments. Other factors, such as nationwide concern over cyber-attacks and terrorism, or other locally or state driven lists of priorities and identified needs may also influence the Integrated Preparedness Plan.

Drawing from these assessments, the IPPW participants determined the following priorities will be the focus for the multi-year cycle of preparedness.

Cybersecurity: Protect (and if needed, restore) electronic communications systems, information, and services from damage, unauthorized use, and exploitation.

Operational Communication: Ensure the capacity for timely communications in support of security, situational awareness, and operations by any and all means available, among and between affected communities in the impact area and all response forces.

Mass Search and Rescue Operations: Deliver traditional and atypical search and rescue capabilities, including personnel, services, animals, and assets to survivors in need, with the goal of saving the greatest number of endangered lives in the shortest time possible.

Infrastructure Systems (Communications, Water, Wastewater): Stabilize critical infrastructure functions, minimize health and safety threats, and efficiently restore and revitalize systems and services to support a viable, resilient community.

Public Health, Healthcare & EMS: Provide lifesaving medical treatment via Emergency Medical Services and related operations and avoid additional disease and injury by providing targeted public health, medical, and behavioral health support, and products to all affected populations.

Operational Coordination: Establish and maintain a unified and coordinated operation structure and process that appropriately integrates all critical stakeholders and supports the execution of core capabilities.

Fire Management and Suppression: Provide structural, wildland, and specialized firefighting capabilities to manage and suppress fires of all types, kinds, and complexities while protecting the lives, property, and the environment in the affected area.

Planning: Conduct a systematic process engaging the whole community as appropriate in the development of executable strategic, operational, and/or tactical-level approaches to meet defined objectives.

Intelligence and Information Sharing: Provide timely, accurate, and actionable information resulting from the planning, direction, collection, exploitation, processing, analysis, production, dissemination, evaluation, and feedback of available information concerning physical and cyber threats to the United States, its people, property, or interests; the development, proliferation, or use of WMDs; or any other matter bearing on U.S. national or homeland security by local, state, tribal, territorial, federal, and other stakeholders. Information sharing is the ability to exchange intelligence, information, data, or knowledge among government or private sector entities, as appropriate.

Community Resilience: Enable the recognition, understanding, communication of, and planning for risk and empower individuals and communities to make informed risk management decisions necessary to adapt to, withstand, and quickly recover from future incidents.

To track performance, the Vermont Emergency Management Training and Exercise Program will review the progress of the work plans toward building and sustaining capabilities on an annual basis. The Integrated Preparedness Plan will be augmented to ensure growth or continuity occurs as appropriate.

Methodology and Tracking

Our methodology will:

- Challenge participants with increasingly advanced coursework.
- Incorporate, reinforce, and verify lessons observed.
- Identify demonstrated capabilities and areas in need of improvement.
- Provide a means of evaluation and corrective action for exercises.
- Ensure a method to share lessons learned and best practices from training courses and exercises.

Plans, trainings and exercises were chosen based on the gaps identified and the corresponding capabilities. Each exercise uses the building block approach and incorporates appropriate trainings throughout the process.

Training Documentation

Vermont Emergency Management tracks training completions via the Learning Management System (LMS). Trainings offered through Vermont Emergency Management are entered into the LMS by the State Training Administrator and upon completion, are granted certificates or credits. Trainings sponsored by Vermont Emergency Management, such as FEMA or National Training Center Courses, are uploaded into the LMS for tracking and completion purposes only. Students may also upload outside trainings to their transcripts for tracking.

All trainings within the LMS, including those that are completed, cancelled or in progress, are trackable and reportable. A variety of reports are generated on a monthly and quarterly basis for use in grant reporting and tracking progress of trainings identified in this Integrated Preparedness Plan.

Exercise Documentation

Exercises are tracked by the State Exercise Administrator using an Exercise Tracker developed in SharePoint. Exercises are tracked from Concept and Objectives Meeting through the After-Action Meeting.

Additionally, exercise Improvement Plans are tracked using an AAR/IP Tracker developed in SharePoint. State level Improvement Plan items are available through SharePoint and Vermont Emergency Management personnel, as well as exercise personnel, can update improvements as they are completed.

The Exercise and Training Program tracks, supports and provides technical assistance to local exercise programs. Vermont requires that all local, regional, and state exercises funded through the State Homeland Security Grant Program be designed, conducted and evaluated in accordance with the Homeland Security Exercise and Evaluation Program (HSEEP). HSEEP is the national standard for exercise implementation and evaluation, and as such, Vermont has adopted HSEEP as the standard. Exercises should be designed so that each one increases in complexity and scope from previous exercises, based on the HSEEP Building Block approach. Additionally, trainings and exercises use a cyclical approach: Once a plan, policy, or procedure is developed then training is provided, the plan is exercised, and the corrective actions and lessons learned are documented in the After-Action Review/Improvement Plan (AAR/IP) format. The plan, policy, or procedure is then updated based upon gaps identified in the exercise. Then the cycle begins again. Use of the building

block approach ensures a successful progression in exercise complexity and allows for the appropriate training and preparation to occur prior to participation in exercises.

Plan Maintenance

In order to provide an effective training and exercise program, Vermont will fully update this Integrated Preparedness Plan annually by:

- Performing Integrated Preparedness Planning Workshops
- Reviewing assessments, including Threat and Hazard Identification and Risk Assessment, Stakeholder Preparedness Review, Vermont Emergency Management Engagement Survey, Exercise After Action Reviews, Real-World Event Improvement Plans
- Reviewing input from partners, State leadership and policy group officials.
- Review federal documents such as the National Preparedness Report, Notice of Funding Opportunities, and Information Bulletins.

On a quarterly basis, Vermont Emergency Management will incorporate minor updates to this plan. Please share any necessary updates with the plan points of contact on page 1 for incorporation.
